

### Remarks

As a supplement to the May 8, 2007 Amendment, Applicant has amended Claims 24, 27, 30, 32, 36, and 40 and canceled Claims 31 and 41 in response to a telephone interview with the Examiner on June 7, 2007.

In that telephone conversation, the Examiner agreed to withdraw the outstanding rejection of the claims over the patents to Suzuki et al. and Shaw if the independent claims are amended to recite the inputting of start and end times for setting a time period, the determining the stored still image information whose time information is within the set time period between the start and end times, and the printing of all the still image information whose time information is determined to be within the set time period between the inputted start and end times. In addition, the Examiner requested the cancellation of Claims 31 and 41 and the amendment of Claims 30 and 40 to recite a computer-readable recording medium on which is recorded a computer program.

In response, while not conceding the propriety of the rejection and the Examiner's request to amend the claims in the telephone interview, Applicants have so amended the claims solely to advance prosecution. Accordingly, the application is now in allowable form. Therefore, early passage to issue is respectfully solicited.
